

Global Point of Care Molecular Diagnostics Market is expected to grow with the rising CAGR of 14.7% during the forecast period 2018 - 2023

Date : May 25, 2018

Global point of care (POC) molecular diagnostics market is anticipated to achieve USD 1440.2 million by 2023, at a CAGR of 14.7%. The study tracks and analyzes competitive developments love product launches & approvals.

Bharat Book Bureau Provides the Trending Market Research Report on "Global Point of Care Molecular Diagnostics Market, Forecast to 2023" under Life Sciences category. The report offers a collection of superior market research, market analysis, competitive intelligence and industry reports. Global POC Molecular Diagnostics Market is projected to grow at a CAGR of 14.7% The global point of care (POC) molecular diagnostics market is expected to reach USD 1440.2 million by 2023 from USD 725.5 million in 2018, at a CAGR of 14.7%. Growth in the POC molecular diagnostics market is driven by the increasing prevalence of infectious diseases, rising focus on decentralized diagnostics, and the growing demand for CLIA-waived molecular POC tests. However, inadequate reimbursement and stringent regulatory policies are likely to restrain the growth of this market during the forecast period. <https://www.bharatbook.com/MarketReports/Sample/Reports/1084760> The INAAT technology is expected to grow at highest CAGR during the forecast period Based on technology, the POC molecular diagnostics market is segmented into RT-PCR, INAAT, and other technologies. The INAAT segment is expected to grow at highest CAGR during the forecasted period. The increasing popularity of INAAT for infectious diseases diagnosis is expected to drive this market in the coming years. Asia Pacific is projected to grow at the highest CAGR during the forecast period While North America is expected to account for the largest share of the global POC molecular diagnostics market, Asia Pacific is projected to grow at the highest CAGR during the study period. The key factors influencing the growth of this market include growing initiatives by market players, rising demand for influenza A/B tests, decentralized healthcare delivery systems, and increasing patient population base in this region. Break-up profile of primaries: - By Company Type- Tier 40%, Tier 30%, and Tier 30% - By Designation-C-level-27%, D-level-18%, and Others-55% - By Region-North America-50%, Europe-20%, Asia Pacific-20%, and RoW-10% The key players in the global POC molecular diagnostics market are Roche Diagnostics (Switzerland), Abbott Laboratories (US), Danaher (US), Biomerieux (France), and Meridian Biosciences (US).
