

Future Electronics Promotes 2019 Bike to Work Initiative to Lower Carbon Emissions

Date : Jul 11, 2019

Future Electronics is promoting the "Going Green" Bike to Work initiative for their employees in 2019.

Montreal, Canada (freepressreleasedb) July 10, 2019 - Future Electronics, a global leading distributor of electronic components, has brought back the "Going Green" Bike to Work initiative for 2019.

On Fridays during the months of July, August, September and October, [every Future employee who rides](#) their bike or rollerblades to work at the corporate headquarters in Montreal will receive a free breakfast in the cafeteria.

If 40 employees ride their bikes to work once a week for 4 months, and travel a distance of 7.5 Km, they would reduce CO2 emissions by approximately one ton! And during the summer construction season, biking to work is often faster than driving through detours or sitting in traffic.

[Future encourages all their employees](#) to make environmentally cleaner and more sustainable transport choices.
