As a tough model, Airwheel S5 two wheel self-balancing electric scooter installs 16-inch large wheel hubs and battery with large capacity. The two tires are specially designed with unique tread pattern to ensure S5 2-wheeled electric scooter is aggressive enough to conquer any road conditions, such as the desert, mountain field or gravel road. The instantaneous power of the motor could reach 1500 W. The 680 WH battery, as mentioned above ensures that the vehicle could run long time.

Riding on different road conditions, Airwheel S5 self-balancing 2 wheels scooter can prevent the rides from dirtying thanks to the splash guard made of aviation aluminum high strength, high hardness and light weight. Whatâ€™s more, some external equipment like tool box, camera and headlamp can be mounted on it, bringing much convenience for the outdoor travelling.

With upgraded CPU and the performance, Airwheel S5 2-wheeled electric scooter is substantially improved to react ridersâ€™ commands more timely and accurately. The intelligent turn signals mounted on S5 intelligent electric scooter can be lighted up automatically when riders make a turn. The automatic component greatly enhances riding safety. A tough model in Airwheel named S5 double-wheels electric scooter will enable people to get away from the tedious daily life and enjoy the outdoor scenery fully and care-free.
