

Real Estate Hub Offers Real Estate Reviews for Filipinos

Date : Nov 30, 2017

Buying a residential property is one of the most significant decisions Filipino families will make. Real Estate Hub reviews different properties to help them decide on which home to purchase.

[Philippines - 11/30/2017] - Real Estate Hub understands the significance of investing in a residential property. So, it helps Filipino families find a new living space by publishing real estate reviews. Its website offers reports and insights on the latest listings in the Philippine real estate market. With its help, Filipinos can search for their ideal home, whether they prefer renting or buying.

The Renting vs. Buying Question in the Philippines

With steep prices in the property market, Filipinos often prefer renting to buying. Last December, the Business Mirror reported that two-thirds of Filipinos would rather rent a house or condominium than buy one. About 60% of them claimed that affordability was the biggest deterrent to home ownership. The article also cited fewer responsibilities and greater freedom as main reasons behind the preference for renting.

Experts noted, however, that buying a house or condominium unit is still the better option. A title offers more security than a rented space, after all. Furthermore, the Inquirer reported that today, Millennials are one of the strongest markets for affordable homes.
